Our New York patrons may readily reach us by Brocklyn Bridge and Union L line to Driggs at station on our corner, or by terms from Boosevelt st., Grand st., and East 25d st. to Broadway. Brooklyn.

WHERE TO BUY MY FUR CAPE?

Ladies' Fur Capes are made from the Alaska Seal, the Sables, the Persian Lamb, the Astrachan, the Mink. Few establishments keep a full range of these furs. Fewer still keep a full range of sizes, and still fewer manufacture them on the premises.

We do all three! Besides-if a cape to measure is needed in 2 or 3 days we're prepared to make and deliver it—little need be said about price; we're satisfied you'll see to that part; dare say most ladies know buying from the store is buying from first hands-like getting your furs at

wholesale.

SUN IT IN THE SEE YOU ALL OUR OPERATIONS GUARANTEED THE BEST HIGH-CLASS WORK.

COMFORTABLE. PROCESS. NO PAIN. YOUR TEETH DURABLE. WE MAKE EXTRACTED. CALL UPON US FIRST. ARTIFICIAL TEETH WITHOUT A PLATE

If you have but three firm roots or teeth in EITHER JAW, we can attach to them a full set of teeth, which being cemented solidly to the teeth or roots, are immovable, and you can eat with them as with the natural teeth. Our bridge work is even more rigid and solid than the natural teeth, for the bridges, being made of a solid bar of gold, brace the teeth upon which they are attached, and prevent lateral pressure or strain. We prefer, of course, that ALL of the natural roots should be left in the jaw, that we may build upon each a crown, for if the mouth be in this condition we can the more nearly imitate the natural teeth in feeling to the tongue; but for appearance, CROWNS affixed either singly or upon a BRIDGE, are a perfect imitation of the natural teeth in COLOR, FORM, SOLIDITY,

Our operations are not an experiment. We have been doing this work for ten years, during which time we have inserted over 50,000 crowns and bridges. If you have not heard of it before it is because your friends who wear our work do not care to tell you that they have artificial teeth, and our operations are so perfect that you would

never dream that your friends' teeth are artificial. We make no charge for consultation, and would be happy to show our work on models and describe it carefully to any who may desire to see and learn of it. Or, if living at too long a distance, a call is not convenient, to any who are so placed we will gladly send a pamphlet descriptive of the work mailed free.

WE ARE THE

INVENTORS, PROPRIETORS, AND PROJECTORS

Of over Thirty Patents, covering the Sheffield Crowning System, patented in the UNITED STATES, ENGLAND, FRANCE, BELGIUM, ITALY, SPAIN, and AUSTRIA. Send for Pamphlet. Mailed Free.

"Bridge Work" (Fig. 3). Fig. 3-A specimen of Bridge Work.

Fig. 4-" Bridge Work" applied : being Figs. 2 and 3 combined.

DON'T HAVE YOUR TEETH EXTRACTED.

"ARGENCIA,"

Our new metal for CROWN and BRIDGE work gives beauty of finish, SOLIDITY IN CONSTRUCTION, and is the lowest priced and best form of this work. Call and see it and get an estimate for your work.

LOW PRICE.

Terms invariably cash, half in advance, balance when work is completed. We always make an estimate before beginning an operation, that no misunderstanding can occur.

DENTISTRY ON BUSINESS PRINCIPLES.

Besides our specialty of making artificial teeth without a plate, we are now prepared to perform every operation in dentistry on a very large scale, and, in order to meet the requirements of the public and give every one a chance to have good work, we have arranged a schedule of prices which brings a class of work hitherto too expensive for many WITHIN THE REACH OF ALL

OPERATIVE DEPARTMENT.

In this important department we have a number of the best operators, all graduates of the highest dental colleges in this country, all experts, and all having had long experience in the peculiar methods of Dr. Sheffield, which make the excavation and filling of teeth easy, painless, and perfect. In this department we treat abscesses (ulcerated teeth), cure spongy gums, treat teeth loosened by deposits of tartar, and tighten them, restoring them to usefulness. We fill teeth in every manner, with Gold, Amalgam, Bone filling, Cement, Gutta-percha, Tin-foil, and in every known method for preserving and beautifying the teeth. AND WE ARE PREPARED TO DO ALL THESE OPERATIONS AT COUNTRY PRICES, though we pay an enormous city rent, and pay for the best talent, our rent alone being a greater sum than the total receipts of nine-tenths of the dentists of America. We can afford to do our work at a low price because we do so much of it that we have in the aggregate a large profit; whereas a dentist who depends wholly upon what his own pair of hands can produce must get a high price for his goods in order to live.

Come and let us make an estimate. MECHANICAL DEPARTMENT.

We produce every operation in this department, which, after years of experience, we have found to be beautiful. but, above all, practical.

We make plates of hard rubber (Vulcanite). This material produces an accurate fit, being easily moulded and adapted to the unevenness of the gums. The principal advantage of rubber over other methods is its cheapness of construction, but it has its drawbacks, the chief of which is that, being a non-conductor of thermal changes, the gums be-

come inflamed and sore from heating.

The most beautiful plate work ever invented is Continuous Gum Work, or PORCELAIN WORK, in which the natural gums and roof of the mouth are imitated EXACTLY in form and color, being so perfect that it is impossible to detect them as artificial. We make this work at ONE-THIRD less than it can be had anywhere else. Our gold plate work is beautiful and light to wear. We charge twenty per cent. less than the same class of work can be had elsewhere.

"ARGENCIA."

After long experiment we have been able to produce this metal, "Argencia," which we make into plate work, and we feel confident that it is the best metal ever invented for this special work. It is lighter than any other metal, and has all the advantages of gold, with the additional advantage of cheapness. We produce plates of "Argencia" at an astonishingly low figure. Come and see this work.

During the dull season and until the 1st of October, in order to keep our large force constantly employed, we will perform all the following operations at about one-half the regular rates:

Crowns and Bridges, per Crown, Gold, \$10.00; regular price, \$15.00 Silver and Platina, 5.00; Gold Plates, . . 50.00 15.00 Fillings, Gold, . . . 5.00 Cement or Amalgam, . . 3.00 5.00

These prices are only for the dull season, to keep all our dentists employed, and to give those who remain in the city during the dull season, and who cannot afford to pay a large price, a chance to have our crown and bridge work.
